CREATE A WALL-MOUNT TOPPING STATION COMPONENT SELECTION GUIDE

Take advantage of open wall space above the counter and give your dessert program an upgrade. Arranging products in tiers not only conserves valuable counter space, but saves motion in assembling menu items. Plus, workers have more things within easy reach.

Wall-mounted components allow you to display and scoop or ladle toppings from clear jars, quickly portion dry ingredients and top with whipped topping. All the options are listed here.

DECIDING ON A DRY PRODUCT DISPENSER

If you're looking to dispense accurate portions of dry ingredients quickly, a Dry Dispenser may be your solution. The 1L and 2L hopper systems portion powders and other dry products in ¼ oz to 2 oz (7 - 60 mL) portions by volume and are adjustable in ⅛ oz (3.4 mL) increments. Wall-mount models are designed for combining with other equipment on a single bracket and do NOT include a mounting bracket

Suggestions for use include smoothie powders, mix-ins for blended ice cream drinks, candies, peanuts and more. As a guideline, consistent shapes ½" (1.3 cm) in diameter or smaller work best. Sticky products, such as crushed candy bars are not recommended.
