297 SERIES SLIM-LINE VERTICAL CONTACT TOASTER

Model 297-T12

Prince Castle's Slim-line Bun Toaster provides perfect carmelization by contact toasting. These toasters put versatility in your kitchen by using less counter space. A unique two-level platen design allows operators to toast thicker bun crowns and thinner bun heels at the same time. A self-adjusting chain assembly provides proper tensioning and helps prevent binding. Model 297-T12 toasts 2000 buns per hour, Model 297-T20 toasts up to 1400 buns per hour, and Model 297-T40 toasts up to 720 buns per hour. Stainless-steel construction makes this toaster durable and easy-to-clean.

All Prince Castle Slim-line Toasters include a Teflon® sheet kit consisting of a stainless-steel clamp and two Teflon® sheets to protect against bun sticking. These sheets are used one at a time over the platen to protect the toasting surface, to eliminate bun sticking, and to keep the toaster clean and working properly.

STANDARD FEATURES

- Delivers higher speeds and temperature while maintaining proven reliable design
- Stronger motor and higher temperature platen increases performance
- Unique two-level platen design allows operators to toast thicker bun crowns and thinner bun heels at the same time
- Adjustable bun crush controls and thermostat allows precise toasting for various bread products
- Compact design requires only 8" (20.3cm) of counter space depth
- 12-, 20- and 40-second toasting models are available
- Re-designed conveyor assembly improves reliability
- Easy to clean and maintain
- Adjustable thermostat for precise toasting
- One-year parts and labor warranty
